

CS211 Data Structures and Algorithms Lab

Aug -- Nov, 2019

First evaluation of project

Maximum marks: 10

Due on 7th September (Saturday)

- In the first evaluation, if your program obtains a non-zero profit for all 31 test cases in Optil.io, you secure full marks.
- In every other case, 0 marks will be given.
- You may create an account in Optil.io and test your code before the submission.
- You may use any language for this project.
- Every team will be given with a serial number once the team registration is over.
- If there is only one source file, please name it with the serial number. For ex: 2.cpp.
- If there are multiple source files, please go through Optil.io help on how to create a file that is ready-to-submit at Optil. In that case, you have to provide a script to generate the ready-to-submit file and a readme file describing how to use the script. Compress all these files as a zip file and name it with the serial number of your team. For example: 2.zip. In this case also, you have to name the main source file with the serial number of your team.
- There will be a penalty of 10% if the naming scheme is not followed.
- The submission is due on 7th September 11:59 pm. If you submit after 7th September but before 14th September 11:59 pm, there will be a penalty of 10% on the marks you deserve otherwise.
- Your submission after 14th September will not be considered for first evaluation.
- Only one submission per team is required and it must be done through Moodle.
- Submissions through every other means will be ignored.
